XVR-01 Vacuum Release Valve

The purpose of this valve is to release vacuum pressure from the vacuum pencil, without any force on the pencil, which may create the displacement of the part being placed.

Release of vacuum by opening hole will cause the movement of part "P" By pressing XVR-01 a part is released without any side movement. For use with vacuum sources: XVP-200, X-ServiCE, XVB-1 and XMP-300 series.
